

Removing a Street Tree

The Permit Process

Removing a street tree requires a contractor to obtain a permit from the Landscape Architecture Division

1 Resident submits request to Fremont's Urban Forestry Division (510) 979-5700 and describes reason for request

2 Urban Forester reviews request, inspects tree and leaves a letter to the resident informing them of the visit and if their request is approved

3 If request is approved, resident selects a contractor from the city's Approved Tree Contractors List at www.fremont.gov to perform maintenance

4 Contractor obtains removal permit from Landscape Architecture Division
