Walnut Residences

I support Walnut Residences, a green, ecofriendly housing proposal for local residents and workers near the Fremont BART station. The plan would require the developer to pay traffic mitigation fees and implement a traffic demand management plan while also generating millions of dollars in new tax revenue for Fremont including funding for police, fire, street maintenance, parks, libraries, and other public services.

Please add my name to the list of supporters of the Walnut Residences that will be provided to the Fremont City Council.

comments: We need workforce housing near transit to support the growth of Fremont and Silicon Valley. I would rather see developments concentrated around BART than spreading throughout town. This should be approved. 20,000 people voted for Harrison and he has done a great job for Fremont with the developments.

comment: I would like to know more about the green building materials and what makes it sustainable. I do support this type of project but I wish it was as sustainable as an 'Earthship'.
