Bicycling Resources

Be ready to ride when you need to.

Ride A Well-Equipped Bike

Ride as close as practical to the right except when travelling at the normal speed of traffic. Use the left side of the road when passing, or turning left. Always ride on the right side of the road, even if there are no other cyclists.

Brakes

Brake pads should not be worn too thin. Brake levers should not pull all the way down to your handlebars.

Gears

Pedals are attached to the crankset. They should be in good condition, without cracks or warping. Brake levers are tight. They are usually found on your hubs (in the center of the wheel) and should be checked for any looseness.

Reflectors

These segments indicate areas where bike lanes are dropped, railroad crossings, or freeway on-ramps to the right. These areas can be dangerous for cyclists. Be extra cautious when approaching these areas.

U-locks

These offer greater comfort to less-experienced bicyclists. They are usually found on your handlebars and body. Make sure they are secure and cannot be easily removed.

Headlight

Use a powerful front headlight (visible from 500') and rear reflector (visible from 600') for riding at night or when visibility is poor.

How do you stay on the good side of motorists?

Make eye contact with motorists when passing them. If you are following a motorist, make sure they can see you. You should use your mirror to make sure you are not taking up an unnecessary amount of space in the road. When passing, use your mirror to check that you are not taking up an unnecessary amount of space in the road.

How do you get through intersections safely?

Use caution when passing through intersections. Look both ways before turning or crossing. Make sure you have enough room to turn or cross safely. Ride to check braking and shifting. Take a test ride at a safe speed to check your braking and shifting.

Obey All Signs & Traffic Lights

Use hand signals to inform others of your intentions. Use your turn signal to indicate your intentions clearly. Use your hand signals to indicate your intentions clearly. Use your hand signals to indicate your intentions clearly.

Avoid Road Hazards

Use your mirrors to check your blind spots. Do not ride too close to other vehicles. Be aware of your surroundings and be prepared for the unexpected. Use your mirrors to check your blind spots. Do not ride too close to other vehicles. Be aware of your surroundings and be prepared for the unexpected.

Go Slow On Sidewalks

Use caution when passing people who will allow you right-of-way, even if it is not legal. Be aware of your surroundings and be prepared for the unexpected. Use caution when passing people who will allow you right-of-way, even if it is not legal. Be aware of your surroundings and be prepared for the unexpected.
