

## Green Bike Lanes

Green bike lanes are intended to increase awareness of bicyclists in the roadway by drawing the attention of cyclists and drivers to the “conflict zone”.

### As a motorist:

- Do not enter the solid green bike lane
- Wait for bicyclists to pass through the dashed green bike lane (the conflict zone) before making a right turn
- Do not speed up to cut off a bicyclist

### As a bicyclist:

- Be aware that motorists will be turning right across the bike lane in the dashed green area
