CERTIFICATION

“WE DECLARE THAT, TO THE BEST OF OUR PROFESSIONAL KNOWLEDGE AND BELIEF, WE MEET THE DEFINITION OF ENVIRONMENTAL PROFESSIONALS AS DEFINED IN §312.10 OF THIS PART.”

“WE HAVE THE SPECIFIC QUALIFICATIONS BASED ON EDUCATION, TRAINING, AND EXPERIENCE TO ASSESS A PROPERTY OF THE NATURE, HISTORY, AND SETTING OF THE SP. WE HAVE DEVELOPED AND PERFORMED THE ALL APPROPRIATE INQUIRIES IN CONFORMANCE WITH THE STANDARDS AND PRACTICES SET FORTH IN 40 CFR PART 312.”

LIMITATION

THIS PHASE I - ENVIRONMENTAL SITE ASSESSMENT REPORT (REPORT) HAS BEEN PREPARED BY THE CONSULTING GROUP (TCG) FOR THE EXCLUSIVE USE OF TCG AND CITY OF FREMONT (CLIENT), AND NOT FOR USE BY ANY OTHER PARTY. ANY USE BY A THIRD PARTY OF ANY OF THE INFORMATION CONTAINED IN THIS REPORT SHALL BE AT THEIR OWN RISK AND SHALL CONSTITUTE A RELEASE AND AN AGREEMENT TO DEFEND AND INDEMNIFY TCG FROM AND AGAINST ANY AND ALL LIABILITY IN CONNECTION THEREWITH WHETHER ARISING OUT OF TCG'S NEGLIGENCE OR OTHERWISE.

ALL INTERPRETATIONS, CONCLUSIONS, AND RECOMMENDATIONS ARE BASED SOLELY ON INFORMATION GATHERED DURING THIS INVESTIGATIVE STAGE AND ON NO OTHER UNSPECIFIED INFORMATION. THIS REPORT IS PREPARED AS A TOOL FOR THE CLIENT TO USE IN DETERMINING THE CONDITION OF THE SP. THIS REPORT MAKES NO CERTIFICATION, EITHER IMPLIED OR OTHERWISE, THAT THE SP IS FREE FROM CONTAMINATION; IT SIMPLY REPORTS THE FINDINGS OF THE STUDY. SAMPLING, IF PERFORMED, IS SO SAMPLE SPECIFIC THAT IF CONTAMINANTS ARE NOT FOUND IN A SAMPLE IT DOES NOT UNIVERSALLY SUGGEST THAT THERE ARE NONE OF THESE CONTAMINANTS PRESENT AT THE SP. IT WOULD BE EXTREMELY DIFFICULT, IMPRACTICAL AND COSTLY TO CERTIFY THAT A SP WAS COMPLETELY FREE OF CONTAMINANTS AND A PHASE I - ENVIRONMENTAL SITE ASSESSMENT IS NOT INTENDED TO DO SO.

THE RESULTS AND FINDINGS CONTAINED IN THIS REPORT ARE BASED ON CERTAIN INFORMATION FROM SOURCES OUTSIDE THE CONTROL OF TCG. WHILE EXERCISING ALL REASONABLE DILIGENCE IN THE ACCEPTANCE AND USE OF INFORMATION PROVIDED, TCG DOES NOT WARRANT OR GUARANTEE THE ACCURACY THEREOF. THE REPORT WAS DEVELOPED SPECIFICALLY FOR THIS PROJECT (**CALIFORNIA NURSERY, 36501 NILES BLVD., FREMONT, CA**) AND SHOULD NOT BE USED FOR ANY OTHER SITE.

THIS REPORT IS COVERED BY COPYRIGHT LAW. ANY REPRODUCTION, EITHER IN TOTAL OR IN PART, WITHOUT THE PERMISSION OF TCG IS PROHIBITED.

RECS, CRECS, HRECS AND DE MINIMIS DEFINITIONS¹

3.2.78 *recognized environmental conditions*—the presence or likely presence of any *hazardous substances* or *petroleum products* in, on, or at a *property*: (1) due to release to the environment; (2) under conditions indicative of a *release* to the environment; or (3) under conditions that pose a *material threat* of a future *release* to the environment. *De minimis conditions* are not *recognized environmental conditions*.

3.2.18 *controlled recognized environmental condition*²—a *recognized environmental condition* resulting from a past *release* of *hazardous substances* or *petroleum products* that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls (for example, *property* use restrictions, *activity and use limitations*, *institutional controls*, or *engineering controls*). (See [Note 2.](#)) A condition considered by the *environmental professional* to be a *controlled recognized environmental condition* shall be listed in the findings section of the *Phase I Environmental Site Assessment report*, and as a *recognized environmental condition* in the conclusions section of the *Phase I Environmental Site Assessment report*. (See [Note 3.](#))

3.2.42 *historical recognized environmental condition*—a past *release* of any *hazardous substances* or *petroleum products* that has occurred in connection with the *property* and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the *property* to any required controls (for example, *property* use restrictions, *activity and use limitations*, *institutional controls*, or *engineering controls*). Before calling the past *release* a *historical recognized environmental condition*, the *environmental professional* must determine whether the past *release* is a *recognized environmental condition* at the time the *Phase I Environmental Site Assessment* is conducted (for example, if there has been a change in the regulatory criteria). If the EP considers the past *release* to be a *recognized environmental condition* at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a *recognized environmental condition*.

3.2.22 *de minimis condition*—a condition that generally does not present a threat to human health or the *environment* and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis conditions* are not *recognized environmental conditions* or *controlled recognized environmental conditions*.

¹ From ASTM E1527-13.

² NOTE 2—For example, if a leaking underground storage tank has been cleaned up to a commercial use standard, but does not meet unrestricted residential cleanup criteria, this would be considered a controlled recognized environmental condition. The “control” is represented by the restriction that the property use remains commercial.

NOTE 3—A condition identified as a *controlled recognized environmental condition* does not imply that the *environmental professional* has evaluated or confirmed the adequacy, implementation, or continued effectiveness of the required control that has been, or is intended to be, implemented.

EXECUTIVE SUMMARY

This report presents the findings of the Phase I - Environmental Site Assessment (Phase I) performed by The Consulting Group (TCG) in Fremont, California at 36501 Niles Blvd (Subject Property [SP]). The Phase I was performed in accordance with the American Society of Testing Materials (ASTM) practice standards E1527-13, California State and Local Requirements and the EPA regulation – All Appropriate Inquiry (AAI).

The SP is located (Figures 1 through 7) in a mixed Residential/Commercial area of Fremont. The SP is an operating Community Garden and City Park that was a former nursery covering approximately 768,868 square feet or approximately 16.75 acres. The Phase I is a non-intrusive historical study consisting of inspection of the SP grounds, all accessible buildings³ and the surrounding area.

Inspection of the SP revealed some of potential concern, but these possible environmental concerns are not part of a normal Phase I, so they are presented as Out-of-Scope [non-scope] possible concerns. There are no “Recognized Environmental Conditions” (RECs), “Controlled Recognized Environmental Conditions” (CRECs) or “Historical Recognized Environmental Conditions” (HRECs), on the SP.

Table ES.1 - Items Noted at Address

Address	Out-of-Scope Possible Concerns	REC	CREC	HREC	De Minimis
California Nursery, 36501 Niles Blvd.	Suspect Asbestos Containing Material (ACM) in Structures Suspect Lead Based Paint (LBP) and Lead Containing Paint (LCM) in structures Pesticides used throughout the nursery Suspected Water Treatment Plant	NONE	NONE	NONE	Storage of Pesticides, Herbicides and Fungicides in retail packaging
Notes: Out-of-Scope = beyond scope of ASTM E1527-13, REC = Recognized Environmental Condition, CREC = Controlled Recognized Environmental Condition [subset of REC], HREC = Historical Recognized Environmental Condition, “de minimis” = issue present, but no impact. (all according to E1527-13 definitions)					

The adjacent parcels are used as:

- Mostly residential surrounding the SP and mixed residential/commercial uses to the west/east/south/north.

³ Were not able to access three buildings - #1, #11 and #13 on Figure 7. Our keys would not open any of the locks.

A neighborhood/area drive-by did reveal some listed sites and their potential environmental issues can be classified as RECs, CRECs or HRECs. The closest listed site to the SP is **BAY AREA GOSPEL CHAPELS 36680 NILES BLVD. FREMONT, CA 94536** for having submitted manifests. The closest listed site of concern is **DAVE'S FOREIGN AUTO (LIBERTY STATION) 36389 MISSION BLVD, FREMONT, CA 94536**, but the case has been closed. Listed sites within a ¼ mile of the SP do not appear to have the potential to affect the SP.

Regulatory agency databases and other sources were reviewed to determine environmental conditions at the SP, adjacent properties, and/or nearby properties that may affect the SP. Radii of zero miles to over one-mile were established, depending on database searched, for the search.

The SP is a former operating nursery (Figures 3, 4 and 7) known as California Nursery. The three parcels making up the SP are owned by the City of Fremont with Assessor's Parcel Numbers (APNs): **507-006800602, 507-006800400 and 507-006800500**. The SP was not identified on any of the databases searched.

Adjacent/nearby or vicinity properties were identified on the following Federal, State, or regional databases (**Environmental Concerns, Operating Permits or Lists**):

- **(LUST)** The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the State Water Resources Control Board Leaking Underground Storage Tank Information System.
- **(SLIC)** Statewide SLIC Cases, the SLIC (Spills, Leaks, Investigations and Cleanup) program is designed to protect and restore water quality from spills, leaks, and similar discharges.
- **(DEED)** The use of recorded land use restrictions is one of the methods the DTSC uses to protect the public from unsafe exposures to hazardous substances and wastes.
- **(EDR US Hist Auto Stat)** EDR Exclusive Historic Gas Stations Database has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.
- **(EDR US Hist Cleaners)** EDR Exclusive Historic Dry Cleaners Database has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.
- **(RGA LUST)** The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the State Water Resources Control Board in California.
- **(RCRA-SQG)** RCRA - Small Quantity-RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous

and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites, which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

- **(RCRA-LQG)** RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites, which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.
- **(UST)** The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.
- **(VCP)** Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.
- **(CERC-NFRAP)** Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.
- **(CORRACTS)** CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.
- **(RCRA-TSDF)** RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites, which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.
- **(RESPONSE)** Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.
- **(ENVIROSTOR)** The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.
- **(SWF/LF)** The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.
- **(US BROWNFIELDS)** The EPA's listing of Brownfields properties from the Cleanups in My Community program, which provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.
- **(HIST Cal-Sites)** Formerly known as ASPIS, this database contains both known and potential hazardous substance sites. The source is the California Department of Toxic Substance Control. No longer updated by

the state agency. It has been replaced by ENVIROSTOR.

- **(CDL)** A listing of drug lab locations. Listing of a location in this database does not indicate that any illegal drug lab materials were or were not present there, and does not constitute a determination that the location either requires or does not require additional cleanup work.
- **(CA FID UST)** The Facility Inventory Database contains active and inactive underground storage tank locations. The source is the State Water Resource Control Board.
- **(HIST UST)** Historical UST Registered Database.
- **(SWEEPS UST)** Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.
- **(CHMIRS)** The California Hazardous Material Incident Report System contains information on reported hazardous material incidents, i.e., accidental releases or spills. The source is the California Office of Emergency Services.
- **(RCRA NonGen / NLR)** RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites, which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.
- **(FTTS)** FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act) over the previous five years. To maintain currency, EDR contacts the Agency on a quarterly basis.
- **(HIST FTTS)** A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.
- **(FINDS)** The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.
- **(CA BOND EXP. PLAN)** Department of Health Services developed a site-specific expenditure plan as the basis for an appropriation of Hazardous Substance Cleanup Bond Act funds. It is not updated.
- **(CORTESE)** The sites for the list are designated by the State Water Resource Control Board (LUST), the Integrated Waste Board (SWF/LS), and the Department of Toxic Substances Control (Cal-Sites).
- **(HIST CORTESE)** The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This listing is no longer updated by the state agency.
- **(Notify 65)** Listings of all Proposition 65 incidents reported to counties by the State Water Resources Control Board and the Regional Water Quality Control Board. This database is no longer updated by the reporting agency.
- **(HAZNET)** The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, &

disposal method. The source is the Department of Toxic Substance Control is the agency.

- (EMI) Toxics and criteria pollutant emissions data collected by the ARB and local air pollution agencies.
- (HWP) Detailed information on permitted hazardous waste facilities and corrective action ("cleanups") tracked in EnviroStor.

A discussion regarding the sites identified, and their impact to the SP, is included in the text of the report.

The historic information gathered and reviewed showed generally good correlation and nothing out of the ordinary. For the environmental liens, none were found and no use restrictions were recorded. Historical information was gathered to identify potential environmental concerns due to historical activities. Information gathered⁴ was from:

Table ES.2 – Historical and Current Sources

Source	Used	Current	Historical
USGS Historical Topographical Maps	X		X
Historical Aerial Photographs	X	X	X
Sanborn Maps			
City Directory	X		X
Environmental Liens and AULs	X	X	
Building Permits	X	X	X
Vapor Encroachment	X	X	
Assessor Parcel Map (APN)	X	X	
Geotracker	X	X	X

The geology of the area is clayey silts and sands extending to at least six fbg, but more likely, this soil type extends to about 45 to 50 feet below grade (fbg). Below this is weathered and unweathered bedrock. The SP does not appear to sit on any active faults, but to the west, across the San Francisco Bay, is the San Andreas Fault and to the immediate west (<1/8 mile) is the Hayward Fault, both of which cause earth movement. The shallow groundwater in the area is in contact with the atmosphere (Water Table Condition), and appears to be variable. Regional flow is toward the bay and can be affected by topography, rainfall, and/or groundwater pumping.

As the VEC report indicates, there is no direct evidence of vapor intrusion at the SP, and the ten (10) sites (seven actual addresses) listed as possible have been dismissed in the VEC screen report. The report is included as Appendix 11.

A review of the radon results provided in the physical setting section of the Radius Map™ Report with GeoCheck® indicates that radon in the area is not a problem.

⁴ There were no Sanborn Maps available for the SP.

During our inspection, nothing out of the ordinary was observed and an Area/Neighborhood Drive-By was performed on 13 March 2015, where nothing out of the ordinary was observed. None of the listed sites within $\frac{1}{3}$ of a mile, which is the outer radius for the Vapor Encroachment Concern (VEC) screen report, are considered a threat as they are not a REC, CREC⁵, or HREC as defined by AAI, or ASTM.

However, there is a potential with regard to shallow subsurface impact at the SP as it is a former nursery and appears to have been agricultural before development. There are potential issues with regard to the historical use of pesticides, herbicides and fungicides at the former nursery that need to be characterized and assessed. We are recommending further investigation for the presence of pesticides, herbicides, fungicides, petroleum hydrocarbons and metals. To do this we recommend:

1. Design a Composite Sampling and Analysis Program for the subsurface:
 - a. Organochlorine Pesticides by EPA Method 8081
 - b. Organophosphorus Pesticides by EPA Method 8141
 - c. Organochlorine Herbicides by EPA Method 8151
 - d. Petroleum Hydrocarbons by EPA Methods 8260 and 8015 w/Silica Gel Strip, and
 - e. Metals by EPA Methods 6010 and 7470/7471
2. During any building renovation or demolition activities, we recommend:
 - a. Following all Asbestos-Containing Materials (ACM), Lead-Based Paint (LBP) and Lead-Containing Materials (LCM) regulations and requirements with regard to identifying, handling, and disposal
 - b. Following all HAZMAT regulations and requirements with regard to identification, characterization, waste and debris disposal, and recycling.

⁵ CREC is a new category under REC, where the site is undergoing mitigation supervised by an agency.

1.0 - INTRODUCTION

1.1 - INTRODUCTION

This report presents the findings of the Phase I - Environmental Site Assessment (Phase I) performed by The Consulting Group (TCG) in Fremont, California at California Nursery (SP) located at 36501 Niles Blvd. [Figures 1 through 7]. The Phase I⁶ was performed in accordance with the American Society of Testing Materials (ASTM) practice standard #E1527-13, California Requirements and the EPA regulation – All Appropriate Inquiry (AAI).

1.2 - SCOPE-OF-WORK

The Phase I study is a non-intrusive study that looks at the property, its history, and surroundings. During this project, the following scope-of-work was performed for the Phase I:

Table 1.1 - Scope-of-Work

⁶ The research conducted for this study and the report prepared are in general conformance with the EPA “All Appropriate Inquiries” standard and the ASTM 1527-13 “Standard Practices for Environmental Site Assessments: Phase I Environmental Site Assessment Process”. The primary purpose for performing a Phase I ESA is to “...permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations (commonly known as Landowner Liability Protections) listed in Comprehensive Emergency Response Compensation and Liability Act (CERCLA) liability.” (ASTM, 2013) Further, it is the goal of this study to identify business risks associated with the property associated with environmental conditions.

Vapor Encroachment Condition (VEC) Screen	App. 11
Summary Resumes	App. 12

Figures are also attached in support of the information presented below.

1.3 – LIMITATION OF STUDY/DATA GAPS

“Data Gaps” are missing database reports or other historical information and drawings/maps, but these reports are only pieces of the historical record used for the Phase I and should be considered as such. There are no Sanborn Maps for this SP and this is considered Missing Data, but not a “Data Gap” because other historical information will fill in the blanks. Missing data can be somewhat re-created by other historical reports, but you must have an understanding of the history of the SP, its occupants, and the area.

1.4 – CLIENT PROVIDED INFORMATION

The client provided the APNs and a layout map of the facility with the structures in their positions with their names that have been reviewed. The map has been presented in Figure 7.

Table 1.2 – Client-Provided Information

Title	Date
Status and History of Site	26 March 2015

1.5 – KEY SITE MANAGER

Roger Ravenstad was the “key site manager” for this project along with Elaine and Bill on-site. They gave us background and history of site for the last 40+ years. A Questionnaire was not completed because this Phase I was not performed for a sale, but as a tool for City of Fremont in its Master Plan Development.

2.0 - SUBJECT PROPERTY INSPECTION

2.1 - INTRODUCTION

On 13 March 2015, Sherwood Lovejoy Jr. inspected the address that makes up the parcel #s **507-006800602, 507-006800400 and 507-006800500** (SP), and its boundaries with other properties. An Area/Neighborhood Drive-by was also performed during this inspection.

2.2 - SUBJECT PROPERTY DESCRIPTION

The SP is located in a commercial/residential area at 36501 Niles Blvd., in Fremont, California (Figures 1 through 7). The SP, which is approximately 768,868 square feet or approximately 16.75 acres, is a former commercial nursery that is used as a community garden and community park. The Assessors Parcel Numbers (APN) are #s **507-006800602, 507-006800400 and 507-006800500**. An Environmental Inspection Form (EIF) for the address is attached in Appendix 1. Selected photographs of the SP and its surroundings are included as Appendix 2.

2.3 - PROPERTY INSPECTION

On 13 March 2015, the SP, its buildings⁷ and property boundaries were inspected. We met with Elaine, Manager of the Community Garden and Bill, volunteer at the community garden. They gave us some history of the SP and their plans for the future. The SP and its boundaries with adjacent parcels were walked and inspected, for any evidence of surface contamination, staining, or other unusual conditions. The tabulated items are organized as Out-of-Scope Possible Concerns, Recognized Environmental Conditions (RECs)⁸, Controlled RECs (CRECs), or Historic RECs (HRECs), and De Minimis.

⁷ Accessible buildings, no access to #1, #11 and #13.

⁸ The goal of this process is to identify Recognized Environmental Conditions associated with the property. A recognized environmental condition is defined as "...the presence or likely presence of any hazardous substances or petroleum products on a property that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property." This definition does not include "*de minimis* conditions that generally do not pose a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate government agencies" (ASTM, 2013).

Table 2.1 - Items Noted in Address

Address	Out-of-Scope Possible Concerns	REC	CREC	HREC	De Minimis
California Nursery 36501 Niles Blvd.	Suspect Asbestos Containing Material (ACM) in Structures Suspect Lead Based Paint (LBP) and Lead Containing Paint (LCM) in structures Pesticides used throughout the nursery Suspected Water Treatment Plant	NONE	NONE	NONE	Storage of Pesticides, Herbicides and Fungicides in retail packaging
Notes: Out-of-Scope = beyond scope of ASTM E1527-13, REC = Recognized Environmental Condition, CREC = Controlled Recognized Environmental Condition [subset of REC], HREC = Historical Recognized Environmental Condition, “de minimis” = issue present, but no impact. (all according to E1527-13 definitions)					

During this inspection, nothing out of the ordinary was observed. We were able to inspect all but three out buildings⁹ and walk the grounds. There was a ACWD water well in the back of the SP, #20 on Figure 7. During this inspection, nothing out of the ordinary was observed, but there are possible issues with regard to the shallow subsurface and the potential use of pesticides, herbicides and/or fungicides that needs to be characterized and assessed.

2.4 – AREA/NEIGHBORHOOD DRIVE-BY

An Area/Neighborhood Drive-By was also performed on 13 March 2015. During this inspection, nothing out of the ordinary was observed. Listed sites that were seen are shown on Figure 5 for orientation.

The adjacent parcels are used as:

- Mostly residential surrounding the SP and mixed residential/commercial uses to the west/east/south/north.

None of the listed sites within 1/3 of a mile, which is the outer radius for the Vapor Encroachment Concern (VEC) report, is considered an issue in regard to the site. The REC, CREC¹⁰, or HREC determination is in Section 3.

⁹ We were not able to access 3 buildings - #1, #11 and #13 on Figure 7. Our keys would not open any of the locks.

¹⁰ CREC is a new category under REC, where the site is undergoing mitigation supervised by an agency.

3.0 - DATABASE SEARCH AND REVIEW

3.1 - INTRODUCTION

Environmental Data Resources, Inc. (EDR), under contract to TCG, performed a database search (Radius Map™ Report with GeoCheck®). The database search and review was performed according to ASTM standards¹¹ with additional regional databases included to meet California requirements. The search was over five radii:

- The SP
- Inside one-eighth mile radius;
- One-eighth mile to one-quarter mile radius;
- One-quarter mile to one-half mile radius; and
- One-half mile to one and one mile radius.

The results of the search and review are briefly described below. Map Index Numbers (MINs) presented in the descriptions below refer to the MINs assigned in the Database Search Report that is attached as Appendix 3. In some cases, a MIN may contain several different site listings and citations with either the same or adjoining addresses.

3.2 – SUBJECT PROPERTY

The SP was not identified on any databases that were searched as part of this study.

3.3 - INSIDE ONE-EIGHTH MILE RADIUS SURVEY

Within this search radius, there are 9 MINs classified as being of environmental concern¹², 0 MINs listed as having operating permits, and 4 MIN was on hazardous substance lists. The

¹¹ Adherence to ASTM also complies with EPA regulations.

¹² Environmental Concerns, as depicted on the database maps, are divided into three categories: Environmental Concerns - High Priority: possible Recognized Environmental Condition (RECs); Environmental Concerns; and Environmental Concerns - With a “no further action status”. The maps included in the database report illustrate the different statuses of sites and their proximity to the SP.

Environmental Concerns – “Active” are those sites that have a citation, or some other listing that warrants special attention.

Environmental Concerns – “no further action” are those sites that cited, but have been closed to the satisfaction of the regulatory agencies. They are not labeled “closed” because they still operate in the manner that caused their listing in the first place.

Environmental Concerns - “closed” are those sites that have met their regulatory requirements and no longer operate in the manner that caused their listing in the first place.

details of the databases searched are presented in the database report included as Appendix 3. Below, if provided, we list “active” sites (“NFA” or “closed” for LUFT sites within a eighth of a mile as well), as these are the sites of potential concern. Other “NFA” or “closed” sites have met their regulatory obligations and should not be a problem in the future from their present cleanup. Following each table, if generated, we summarize the information on referenced sites as they relate to potentially affecting the SP. Additional regulatory information, gathered during this Phase I that updates the database, is also presented here. A complete list of “active”, “NFA”, or “closed” sites, “hazardous substance” listed sites, and “operating permit” listed sites is included in the Radius Map™ Report with GeoCheck® in Appendix 3.

Table 3.1 - Environmental Concerns Inside of 1/8 of Mile

Map ID #	Name	Address	Dis (mi)	Dir	Topo	Listing	Status
A4/A5/A6/A7/A8/ A9/A10/A11/A12	DAVE'S FOREIGN AUTO (LIBERTY STATION)	36389 MISSION BLVD	0.076	N	U	LUST	Closed
						RGA LUST	Listed
						H. Cortese	Listed

Based on the information in the EDR database for this search interval, our site reconnaissance, and our understanding of the area, the SP outward to 1/8 of a mile had nine (9) listings for LUST or other environmental concerns. These nine (9) listings are for the same address that has been “closed” or listings with no evidence of impact was found during our site reconnaissance. All other listings within this radius are hazardous substance lists, which are not environmental concerns. A complete list of “active”, “NFA”, or “closed” sites, “hazardous substance” listed sites, and “operating permit” listed sites is included in the database search report in Appendix 3.

3.4 - ONE-EIGHTH MILE TO ONE-QUARTER MILE RADIUS SURVEY

Within this search radius, there is 1 MIN classified as being of environmental concern, 0 MIN have operating permits, and 12 MINs were on hazardous substance lists.

Table 3.2 - Environmental Concerns Between 1/8 and 1/4 of Mile

Map ID #	Name	Address	Dis (mi)	Dir	Topo	Listing	Status
B17		405 RANCHO ARROYO PKWY	0.147	W	D	EDR Hist Cleaners	Listed

Notes: Dis = distance from SP in miles; Dir = direction from SP (west, north, east, south, or some combination); Topo = topographic elevation compared to SP (D: down-gradient/U: up-gradient/E: equivalent); EDR Hist Cleaners =proprietary list of previous drycleaners.

Based on the information in the EDR database for this search interval, and our site reconnaissance, there are no LUST or SLIC listing, so we included the EDR proprietary list, but there is no evidence left to investigate. The site does not that pose a threat to the SP.

Following each table, if generated, we summarize the information on referenced sites as they relate to potentially affecting the SP. Additional regulatory information, gathered during this Phase I that updates the database, is also presented here. A complete list of “active”, “NFA”, or

“closed” sites, “hazardous substance” listed sites, and “operating permit” listed sites is included in the Radius Map™ Report with GeoCheck® in Appendix 3.

3.5 - ONE-QUARTER MILE TO ONE-HALF MILE RADIUS SURVEY

Within the search radius, there are 32 MINs classified as being of environmental concern, 1 MIN having an operating permit, and 41 MINs on hazardous substance lists. Due to the distance from, and the unlikely event that these sites would materially affect the SP, they are not presented in the text. The details of the database search are presented in the Radius Map™ Report with GeoCheck® included as Appendix 3.

3.6 – ONE-HALF MILE TO ONE MILE RADIUS SURVEY

Within the search radius there are 30 MINs classified as being of environmental concern, 7 MINs was listed as having an operating permit, and 34 MINs were on hazardous substance lists. Again, due to the distance from, and the unlikely event, if sites were listed, they would materially affect the SP; they are not presented in the text. The details of the database search are presented in the Radius Map™ Report with GeoCheck® included as Appendix 3.

3.7 – OVER ONE MILE RADIUS SURVEY

Within the search radius, there are 0 MINs classified as being of environmental concern, 0 MINs was listed as having an operating permit, and 8 MINs were on hazardous substance lists. Again, due to the distance from, and the unlikely event, if sites were listed, they would materially affect the SP; they are not presented in the text. The details of the database search are presented in the Radius Map™ Report with GeoCheck® included as Appendix 3.

3.8 - UNMAPPED SITES

There were four (4) unmapped sites: RGA LUST (1), SLIC (1) and ENVIROSTOR (2). No sites had multiple database listings.

4.0 - HISTORICAL INFORMATION REVIEW

4.1 - INTRODUCTION

As part of our research, we also performed a search of records. This search included:

Table 4.1 – Historical and Current Sources

Source	Used	Current	Historical
USGS Historical Topographical Maps	X		X
Historical Aerial Photographs	X	X	X
Sanborn Maps			
City Directory	X		X
Environmental Liens and AULs	X	X	
Building Permits	X	X	X
Vapor Encroachment	X	X	
Assessor Parcel Map (APN)	X	X	
Geotracker	X	X	X

4.2 – HISTORICAL TOPOGRAPHIC MAPS

Historic topographs were reviewed and presented in Appendix 4 from 1906, 1947, 1953, 1961, 1968, 1973 and 1980. They were:

- The Pleasanton Quadrangle (1906, and 1947), and
- The Niles Quadrangle (1953, 1961, 1968, 1973 and 1980).

They show the area developing over time as a mixed residential/commercial area. Even in 1906, both Niles Blvd. and Mission Blvd. were in place. By 1961, there were neighborhoods in the area. In addition, by 1968, the flood canal (Alameda Creek) is prominent and there is more development of the area. By 1980, the area appears developed as today.

4.3 - SANBORN® MAPS

Sanborn Maps were not available for this property. The certification of the Sanborn Maps reviewed is included as Appendix 5.

4.4 - HISTORICAL AERIAL PHOTOGRAPHS

Aerial photographs were reviewed during this project. The years reviewed were 1939, 1946, 1958, 1966, 1968, 1979, 1982, 1993, 2006 and 2012. In 1939, the SP appears as part of undeveloped area, although there appears to be some subdividing of parcels. By 1946, the SP is developed as agriculture along Niles Blvd. By 1958, development of residential has occurred to the east, along Hillview. By 1966, the Flood Control Channel is prominent and the shape of the future nursery is now outlined. By 1982, one can see the nursery, indicating that it was developed between 1970 and 1982. The 2006 aerial shows development, as today and all newer aerial's that were reviewed are pretty much the same. Copies of the aerial photographs reviewed are included as Appendix 6.

4.5 – CITY DIRECTORY

Most searches span circa-1920 to 2013. The city directory for the SP is between 1960 and 2013. The City Directory indicates the SP was not listed on the City Directory, but as an adjacent property. Documentation of the City Directory is included as Appendix 7. A summary is below:

Table 4.2 – City Directory Adjacent Properties Summary

Date	Address					
	36501 NILES – SP	36600 NILES	150 Hillview	175 Hillview	210 Hillview	36762 Riviera

4.7 – PROPERTY TAX MAP REPORT

The Property Tax Map Report is included as Appendix 9. The parcel APNs are #s: **507-006800602, 507-006800400 and 507-006800500**, and the parcel map is in Appendix 9 with SP shown.

4.8 – BUILDING PERMIT REPORT

The Building Permit Report reviewed all available building permit records. The report indicated that the SP has building permits. It was not listed as the SP, but as an adjacent property as with the City Directory. Four permits were issued for the SP as shown in the following Table 4.6:

Table 4.6 – Building Permits Issued for SP

Category	Result
Permit Number 1	
Date:	5/15/2014
Permit Type:	
Description:	
Permit Description:	
Work Class:	Alteration commercial

Status:	Canceled
Valuation:	\$20,000.00
Contractor Company:	
Contractor Name:	

Permits were issued for adjacent properties between 2000 and 2014 for Building, Mechanical, Plumbing, and Roofing. None were for hazardous waste transport or storage. The report is included as Appendix 10.

5.0 - GEOLOGY AND HYDROGEOLOGY

5.1 - INTRODUCTION

TCG reviewed readily available regional and local geologic and hydrogeologic information. The results of that review are briefly described below. The information reviewed included data in Appendix 3, in the Physical Setting Appendix to the Radius Map™ Report with GeoCheck® as well as other referenced material, including Appendix 11 – Vapor Encroachment Condition (VEC) screen report.

5.2 - LOCAL GEOLOGY AND HYDROGEOLOGY

The SP is located east of the San Francisco Bay. The SP is in a mixed residential/some commercial area of Niles District in Fremont in Alameda County with listed properties up-gradient and down-gradient. The shallow subsurface is made of alluvial deposits (clayey silts to silty sands in nature): these fine-grained soils go to approximately 45 - 50 feet below grade (fbg). Weathered and unweathered bedrock underlie the whole area at various depths and various thicknesses (Norris & Webb, 1990). The area topography slopes sharply from the north to the SP and then gently to the south. The topography slopes gently upward from west to east (see Physical Setting Appendix to the Radius Map™ Report with GeoCheck® for north to south elevation graph and a west to east elevation graph). The topography slopes:

- Downward from the north at 565 feet to 62 feet at the SP and then it is relatively flat for about a mile to the south (503' in a mile from the north to SP and 1' in 1 mile from the SP to the south), and
- Upward to the south (10' in a mile from the west to the SP) and upward to the south (38' in a mile from the SP).

Groundwater in the area is typically a layered aquifer system with the shallowest being an unconfined aquifer (Water Table). Below this layer there are multiple layers that are considered semi-confined to confined aquifers. The shallowest aquifer that would most directly influence the SP is affected by topography, seasonal rainfall, and pumping activities (Norris & Webb, 1990).

The SP does not sit on any active faults, but to the west, across the bay, is the San Andreas Fault and to the west, within 1/8 of a mile, is the Hayward fault, both of which cause earth movement.

5.3 - GROUNDWATER WELLS IN THE AREA

TCG reviewed available information for groundwater wells found in the Physical Setting Appendix of Radius Map™ Report with GeoCheck®. The results of that review are briefly described below. The information reviewed is in the Physical Setting Appendix of the Radius Map™ Report with GeoCheck® included in Appendix 3.

No groundwater monitor wells were found, except the ACWD well on the back west portion of the SP.

Twelve (12) wells were found the Federal database researched: **FEDERAL USGS WELL INFORMATION**. None were within 1/8 mile. One (1) was found inside of 1/4 mile, eight (8) were found inside 1/4 - 1/2 mile radius and nine (9) were found inside 1/2 - 1 mile radius.

Table 5.1 - Federal USGS Well Information

MAP ID	WELL ID	LOCATION FROM SP
1	USGS40000183889	0 - 1/8 Mile SW
4	USGS40000183874	1/4 - 1/2 Mile S
13	USGS40000183881	1/2 - 1 Mile ESE

D15	USGS40000183855	1/2 - 1 Mile S
D16	USGS40000183856	1/2 - 1 Mile S
33	USGS40000183844	1/2 - 1 Mile S
G34	USGS40000183840	1/2 - 1 Mile S
G35	USGS40000183841	1/2 - 1 Mile S
H37	USGS40000183912	1/2 - 1 Mile S
H38	USGS40000183913	1/2 - 1 Mile WNW
H39	USGS40000183914	1/2 - 1 Mile WNW

No wells were found the Federal database researched: **FEDERAL FRDS PUBLIC WATER SUPPLY SYSTEM INFORMATION**.

Table 5.2 - Federal FRDS Public Water Supply System Information

MAP ID	WELL ID	LOCATION FROM SP
None		

Sixteen (16) wells were found the State database researched **STATE DATABASE WELL INFORMATION**. Four (4) wells were in the 1/4 to 1/2 mile radius and twelve (12) were in the 1/2 to 1-mile radius.

Table 5.3 - State Database Well Information

MAP ID	WELL ID	LOCATION FROM SP
B6	4747	1/4 - 1/2 Mile NE
B7	4746	1/4 - 1/2 Mile NE
B8	4752	1/4 - 1/2 Mile NE
B9	4751	1/4 - 1/2 Mile NE
E17	4748	1/2 - 1 Mile WNW
E18	4750	1/2 - 1 Mile WNW
F23	4766	1/2 - 1 Mile SSE
F24	4773	1/2 - 1 Mile SSE
F25	4756	1/2 - 1 Mile SSE
F26	4757	1/2 - 1 Mile SSE
F27	4754	1/2 - 1 Mile SSE
F28	4755	1/2 - 1 Mile SSE
F29	4764	1/2 - 1 Mile SSE
F30	4765	1/2 - 1 Mile SSE
F31	4758	1/2 - 1 Mile SSE
F32	4759	1/2 - 1 Mile SSE

The groundwater flow, according to AQUIFLOW¹³, in the area is variable, while regionally it is easterly, toward the San Francisco Bay. Pumping wells, topography and/or seasonal rainfall can all retard/alter groundwater flow. Nothing out of the ordinary was seen.

5.4 – RADON

A review of the radon results provided in the Physical Setting Appendix of the Radius Map™ Report with GeoCheck® indicates that radon standards (Federal and State) are not exceeded and radon in the area is not a problem. The (Zip Code: 94536) average Living Area 1st floor activity is 1.50 Pico Curies/Liter (pCi/L), which the USEPA is considering this Zone 2 (≥ 2 pCi/L and ≤ 4 pCi/L - Federal EPA) indoor average level – first floor (EDR, 2015). The radon information is in Physical Setting appendix of the Radius Map™ Report with GeoCheck® included as Appendix 3.

5.5 – VAPOR ENCROACHMENT SCREEN REPORT

Seven (7) addresses (10 listings: three for the same address: 37048 Niles Blvd and two for the same address: 36389 Mission Blvd) were examined in the Vapor Encroachment Concern (VEC)

¹³ AQUIFLOW is a modeling program used to interpret groundwater flow direction and gradient.

Screen Report. A review of the VEC Screen report (Appendix 11) indicated that the SP address: was not found on any databases. Four-listed (4) sites (two with same address) were found within 528 feet¹⁴, and the other six (6) listed sites (three with same address) were found between 528 feet and 1760 feet¹⁵.

Of the seven (7) addresses, all were ruled out as a Vapor Encroachment Concern (VEC) since they are “not an environmental concern listing”, closed, or outside 0.10 of a mile threshold, if down-gradient. Chemicals of concern (COC) are not likely to be a vapor threat to the SP. The report is included as Appendix 11.

¹⁴ First threshold in the VEC calculations.

¹⁵ Second threshold in the VEC calculations.

6.0 – OBSERVATIONS, CONCLUSIONS, AND RECOMMENDATIONS

6.1 - OBSERVATIONS

6.1.1 - General Environmental Inspection

During the general environmental inspection, we noted any evidence of contamination or the presence of structures that would lead to suspicion of contamination.

Inspection of the SP revealed no “Recognized Environmental Concerns” (RECs), no “Controlled Recognized Environmental Concerns” (CRECs) and no “Historical Recognized Environmental Concerns” (HRECs). There were issues of potential concern, as detailed in the Table below. The potential issues were non-Phase I issues that are presented here for convenience.

Table 6.1 - Items Noted in Addresses

Address	Out-of-Scope Possible Concerns	REC	CREC	HREC	De Minimis
California Nursery 36501 Niles Blvd.	Suspect Asbestos Containing Material (ACM) in Structures Suspect Lead Based Paint (LBP) and Lead Containing Paint (LCM) in structures Pesticides used throughout the nursery Suspected Water Treatment Plant	NONE	NONE	NONE	Storage of Pesticides, Herbicides and Fungicides in retail packaging
Notes: Out-of-Scope = beyond scope of ASTM E1527-13, REC = Recognized Environmental Condition, CREC = Controlled Recognized Environmental Condition [subset of REC], HREC = Historical Recognized Environmental Condition, “de minimis” = issue present, but no impact. (all according to E1527-13 definitions)					

The adjacent parcels are used as:

- Mostly residential surrounding the SP and mixed residential/commercial uses to the west/east/south/north.

During this inspection, nothing out of the ordinary was observed. An Area/Neighborhood Drive-By was also performed on 13 March 2015. During this inspection, nothing out of the ordinary was observed. None of the listed sites within 1/3 of a mile, which is the outer radius for the Vapor

Encroachment Concern (VEC) report, is considered a threat even though they can be a REC, CREC¹⁶, or HREC as defined by AAI, or ASTM. There were issues with regard to the subsurface and use of pesticides, herbicides and fungicides that need to be characterized and assessed.

6.1.2 - Database Search and Review

6.1.2.1 - Within 1/8 Radius

Based on the information in the EDR database for this search interval, our site reconnaissance, and our understanding of the area, the SP outward to 1/8 of a mile had nine (9) listings for LUST or other environmental concerns. These nine (9) listings are for the same site that has been “closed” or listings with no evidence of impact and our site reconnaissance found the site. All other listings within this radius are hazardous substance lists, which are not environmental concerns. A complete list of “active”, “NFA”, or “closed” sites, “hazardous substance” listed sites, and “operating permit” listed sites is included in the database search report in Appendix 3.

6.1.2.2 - Between 1/8 and 1/4 Mile Radius

Based on the information in the EDR database for this search interval, and our site reconnaissance, there are no LUST or SLIC listing, so we included the EDR proprietary list, but there is no evidence left to investigate. The site does not that pose a threat to the SP. Following each table, if generated, we summarize the information on referenced sites as they relate to potentially affecting the SP. Additional regulatory information, gathered during this Phase I that updates the database, is also presented here. A complete list of “active”, “NFA”, or “closed” sites, “hazardous substance” listed sites, and “operating permit” listed sites is included in the Radius Map™ Report with GeoCheck® in Appendix 3.

6.1.2.3 - Between 1/4 and 1/2 Mile Radius

Within the search radius, there are 32 MINs classified as being of environmental concern, 1 MIN having an operating permit, and 41 MINs on hazardous substance lists. Due to the distance from, and the unlikely event that these sites would materially affect the SP, they are not presented in the text. The details of the database search are presented in the Radius Map™ Report with GeoCheck® included as Appendix 3.

¹⁶ CREC is a new category under REC, where the site is undergoing mitigation supervised by an agency.

6.1.2.4 - Between 1/2 and 1 Mile Radius

Within the search radius there are 30 MINs classified as being of environmental concern, 7 MINs was listed as having an operating permit, and 34 MINs were on hazardous substance lists. Again, due to the distance from, and the unlikely event, if sites were listed, they would materially affect the SP; they are not presented in the text. The details of the database search are presented in the Radius Map™ Report with GeoCheck® included as Appendix 3.

6.1.2.5 – Over 1 Mile

Within the search radius, there are 0 MINs classified as being of environmental concern, 0 MINs was listed as having an operating permit, and 8 MINs were on hazardous substance lists. Again, due to the distance from, and the unlikely event, if sites were listed, they would materially affect the SP; they are not presented in the text. The details of the database search are presented in the Radius Map™ Report with GeoCheck® included as Appendix 3.

6.1.2.6 - Unmapped Sites

There were four (4) unmapped sites: RGA LUST (1), SLIC (1) and ENVIROSTOR (2). No sites had multiple database listings.

6.1.3 - Historical Information Review

The historical information¹⁷ review was Topographic Maps, Aerial Photographs, a City Directory, Environmental Liens, Property Tax Map and Building Permits. There was good correlation between each of these items and nothing out of the ordinary was seen. The EDR reports for each of these sources are attached in Appendices. Sanborn Maps were not found by EDR, but this did not hamper our ability to review the address.

6.1.4 - Geology and Hydrogeology

The geology of the area indicates that down to approximately 45 fbg to 50 fbg is a fine-grained soil. Weathered and unweathered bedrock underlie this. The property does not appear to sit on any active faults, but to the west, across San Francisco Bay, is the San Andreas Fault and just to the west (within 1/8 of a mile) is the Hayward Fault, both of which cause earth movement. The shallow groundwater in the area appears to be variable (regional flow toward bay) and is a water table condition that is affected by topography, seasonal rainfall, and/or pumping wells. As the VEC report indicates, there is no direct evidence of vapor intrusion at the SP, and the seven (7) addresses listed as possible have been dismissed in the VEC report. A review of the radon

¹⁷ Sanborn maps were not available.

results provided in the Physical Setting Appendix of the Radius Map™ Report with GeoCheck® indicates that radon in the area is not a problem.

6.2 - CONCLUSIONS

There is potential environmental impact with regard to the shallow subsurface from the use of pesticides, herbicides and fungicides at the SP. The SP was formerly an operating commercial nursery. It appeared previously to be agricultural before development as a nursery.

6.3 - RECOMMENDATIONS

The SP is currently a community garden and community park, was an operating commercial nursery and appears to have been agricultural before development. During this inspection, nothing out of the ordinary was observed. An Area/Neighborhood Drive-By was also performed on 13 March 2015 and revealed nothing out of the ordinary. None of the listed sites within 1/3 of a mile, which is the outer radius for the Vapor Encroachment Concern (VEC) report, is considered a threat even though they can be a REC, CREC¹⁸, or HREC as defined by AAI, or ASTM. There is potential environmental impact with regard to the shallow subsurface from the use of pesticides, herbicides and fungicides at the SP, which need to be characterized and assessed.

We are recommending further investigation for the presence of pesticides, herbicides, fungicides, petroleum hydrocarbons and metals. To do this we recommend:

1. Design a Composite Sampling and Analysis Program for the subsurface:
 - a. Organochlorine Pesticides by EPA Method 8081
 - b. Organophosphorus Pesticides by EPA Method 8141
 - c. Organochlorine Herbicides by EPA Method 8151
 - d. Petroleum Hydrocarbons by EPA Methods 8260 and 8015 w/Silica Gel Strip, and
 - e. Metals by EPA Methods 6010 and 7470/7471
2. During any building renovation or demolition activities, we recommend:
 - a. Following all Asbestos-Containing Materials (ACM) and Lead-Containing Materials (LCM) regulations and requirements with regard to identifying, handling, and disposal
 - b. Following all HAZMAT regulations and requirements with regard to identification, characterization, waste and debris disposal, and recycling.

¹⁸ CREC is a new category under REC, where the site is undergoing mitigation supervised by an agency.

CALIFORNIA NURSERY TIMELINE	
1830's	Jose de Jesus Vallejo built adobe at the site
1862	Jonas Clark acquired the site
1865	John Rock founded the California Nursery
1884	Rock incorporated & moved the nursery to Niles
1884	Palm trees planted at the nursery entry drive; planted when Rock was here
1890	Tank stand built; tank stand post dates packing shed
1890	Packing shed built
1899	William Landers acquired the property
1907	Office Bldg, President's House & Changing Room built
1915	Nursery supplied palms for the Pan Pacific International Exposition
1917	George C Roeding Sr. acquired the nursery
1920s	Garden store built
Early 1920s	Mail order business started
1920-30s	Nursery changed from wholesale to retail operation (1934)
1926	George C Roeding Jr assumed management of the nursery
1926	First color catalog
1934	Entryway to the Nursery built
1937	First residential subdivision built - Adobe Acres
1972	City of Fremont acquired the site
1974	Nakamura ran retail nursery at the site (2 other nurserymen ran nurseries here first)

Comments:

Lead Paint and Asbestos suspected on out buildings
Potential presence of pesticides/herbicides/fungicides in soil

STORAGE BUILDINGS/ROOMS, STORAGE TANKS INSPECTION

Storage Buildings/Rooms:

- Yes No Are any buildings or rooms present that may contain or have contained hazardous materials for purposes?
- Yes No Is there any indication that hazardous materials/waste are or have been stored on the property?
- Yes No Are there plans for the layout of this facility?

Underground Storage Tanks (UST's):

- Yes No Were any underground storage tanks observed on the property?
- Yes No Did any tanks, if present, contain any materials, liquid or solid?
- Yes No Was any evidence of soil contamination observed around the surface cover of the tanks, if present on the property?
- Yes No Were any chemical plants, manufacturing plants, gas stations or petroleum refining, delivery or facilities observed on surrounding properties?
- Yes No Are there plans for the underground storage tanks, if in use or present in the past?

Aboveground Storage Tanks (AST's):

- Yes No Were any aboveground storage tanks observed on the property?
- Yes No Was any evidence of soil contamination observed around the tanks, if present, on the property?
- Yes No Were any chemical plants, manufacturing plants, gas stations or petroleum refining, delivery or facilities observed on surrounding properties?
- Yes No Are there plans for the aboveground storage tanks, if in use or present in the past?

Waste Sites:

- Yes No Is the subject or any neighboring property engaged in storing, transporting or producing chemicals or hazardous substances?

Comments:

11 buildings on SP

WATER RESOURCES INSPECTION

Surface Water:

- Yes No Are there any surface water bodies on the site or passing through it?
 Yes No Was there any evidence of contamination on these surface water bodies (odors, sheen, etc.)?
 Yes No Are there plans for the surface water drainage system of this facility?

Groundwater:

- Yes No Were any groundwater monitoring wells, in use or abandoned, observed on the property?
 Yes No Was there any evidence of contamination around the well?
 Yes No Was there any evidence of contamination in the well (odors, sheen, etc.)?
 Yes No Are there plans for the groundwater system of this facility, if one is or was present?

Drinking Water:

- Yes No Were any water wells, in use or abandoned, observed on the property?
 Yes No Are these wells the primary or sole source of drinking water?
 Yes No Is the property presently on a municipal water system?
 Yes No Are lead or lead soldered pipes visible on the property?
 Yes No Are there plans for the drinking water system of this facility?

Septic System:

- Yes No Was a septic system, in use or abandoned, observed on the property?
 Yes No Is the property presently on a municipal sewer system?
 Yes No Are there plans for the septic system of this facility?

Drains:

- Yes No Are drains present in work areas that could be used for draining liquids from cleaning or machinery or equipment?
 Yes No Are the drains full?
 Yes No Are the drains coated heavily with sludge-type materials?
 Yes No Are there plans for the drain system of this facility?

Comments:

ACWD well on property - #20 on Figure 7

CHEMICAL, GAS & MINERAL INSPECTION

Asbestos:

- Yes No Were signs of asbestos observed on the property?
 Yes No Was the structure constructed prior to 1979?
 Yes No Were any suspected asbestos containing materials observed; such as sprayed mater fireproofing areas, pipe insulation, floor tiles, etc.?

UREA Formaldehyde Foam Insulation (UFFI):

- Yes No Was any evidence of Formaldehyde Foam Insulation observed on the property?

Lead Paint:

- Yes No Was any visible evidence of peeling, cracking or flaking paint observed?
 Yes No Was any visible evidence of lead paint on the ceilings, walls or floors of any structure obse the property?

Pesticides/Herbicides:

- Yes No Does it appear pesticides or herbicides have been used in excess of normal use?
 Yes No Is the property used for agricultural purposes?
 Yes No Are there any noticeable pesticide/herbicide odors?

Fiberglass:

- Yes No Is fiberglass observed as an insulator or for any other purpose?
 Yes No Is fiberglass observed on any surface that appears worn, where individual fibers are expos condition where release into the air appears likely?

Polychlorinated Biphenyls (PCB's):

- Yes No Were any transformers, electrical devices or hydraulic equipment observed on the property lat containing PCBs
 Yes No Was there evidence of PCB contamination to the soil, surface water or groundwater observec property?
 Yes No Were any fluorescent light ballasts suspected to contain or labeled as containing PCB's observ

Mercury:

- Yes No Are there mercury switches present?
 Yes No Are there fluorescent tubes present?

Radon:

- Yes No Is there reason to suspect that radon may be a problem in the dwelling or in the immediate prc locality?
 Yes No Has screening been conducted which indicates that the property may have elevated levels of ra

Comments:

Suspect Lead and Asbestos in or on out buildings
Possible presence of pesticides/herbicides/fungicides from use as nursery

GENERAL

- Yes No Are there any conditions present not mentioned above that need to be corrected to remove potential risks?
- Yes No Activities on adjacent properties that pose potential environmental risks to the subject property

SUMMARY & CONCLUSIONS OF INSPECTION

Underground Storage Tanks (UST's):

- Acceptable
 Suggest Phase II Environmental Audit

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 10/25/2013 has revealed that there are 2 CERC-NFRAP sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/09/2014 has revealed that there are 3 CORRACTS sites within approximately 1.5 miles of the target property.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 12/09/2014 has revealed that there are 2 RCRA-TSDF sites within approximately 1 mile of the target property.

GENERAL ELECTRIC COMPANY	34863 MISSION BLVD	NW 1/2 - 1 (0.888 mi.)	T126	175

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/09/2014 has revealed that there are 3 RCRA-LQG sites within approximately 0.75 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/09/2014 has revealed that there is 1 RCRA-SQG site within approximately 0.75 miles of the target property.

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, and dated 11/03/2014 has revealed that there are 3 RESPONSE sites within approximately 1.5 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 11/03/2014 has revealed that there are 7 ENVIROSTOR sites within approximately 1.5 miles of the target property.

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, and dated 11/17/2014 has revealed that there is 1 SWF/LF site within approximately 1 mile of the target property.

State and tribal voluntary cleanup sites

VCP: Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

A review of the VCP list, as provided by EDR, and dated 11/03/2014 has revealed that there is 1 VCP

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: The EPA's listing of Brownfields properties from the Cleanups in My Community program, which provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

A review of the US BROWNFIELDS list, as provided by EDR, and dated 12/22/2014 has revealed that there is 1 US BROWNFIELDS site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Local Lists of Hazardous waste / Contaminated Sites

HIST Cal-Sites: Formerly known as ASPIS, this database contains both known and potential hazardous substance sites. The source is the California Department of Toxic Substance Control. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

A review of the HIST Cal-Sites list, as provided by EDR, and dated 08/08/2005 has revealed that there are 3 HIST Cal-Sites sites within approximately 1.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/09/2014 has revealed that there are 2 RCRA NonGen / NLR sites within approximately 0.75 miles of the target property.

FTTS: FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act) over the previous five years. To maintain currency, EDR contacts the Agency on a quarterly basis.

A review of the FTTS list, as provided by EDR, and dated 04/09/2009 has revealed that there are 2 FTTS sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>CUSTOM CHEMILILNE</i>	<i>37231 MISSION BLVD</i>	<i>E 1/4 - 1/2 (0.454 mi.)</i>	<i>J80</i>	<i>66</i>
<i>CUSTOM CHEMILENE</i>	<i>37231 MISSION BLVD</i>	<i>E 1/4 - 1/2 (0.454 mi.)</i>	<i>J81</i>	<i>66</i>

HIST FTTS: A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

A review of the HIST FTTS list, as provided by EDR, and dated 10/19/2006 has revealed that there are 2 HIST FTTS sites within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

<i>CUSTOM CHEMILENE</i>	<i>37231 MISSION BLVD</i>	<i>E 1/4 - 1/2 (0.454 mi.)</i>	<i>J81</i>	<i>66</i>

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 08/16/2014 has revealed that there are 4 FINDS sites within approximately 0.5 miles of the target property.

Notify 65: Listings of all Proposition 65 incidents reported to counties by the State Water Resources Control Board and the Regional Water Quality Control Board. This database is no longer updated by the reporting agency.

A review of the Notify 65 list, as provided by EDR, and dated 10/21/1993 has revealed that there is 1 Notify 65 site within approximately 1.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>FREMONT DODGE</i>	<i>3909 THORNTON AVENUE</i>	<i>SW 1 - 2 (1.436 mi.)</i>	<i>135</i>	<i>241</i>

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2013 has revealed that there are 32 HAZNET sites within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 9 EDR US Hist Auto Stat sites within approximately 0.75 miles of the target property.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 2 EDR US Hist Cleaners sites within approximately 0.75 miles of the target property.

EXECUTIVE SUMMARY

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

RGA LUST: The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the State Water Resources Control Board in California.

A review of the RGA LUST list, as provided by EDR, has revealed that there are 24 RGA LUST sites within approximately 0.5 miles of the target property.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D018
Waste name: BENZENE

Violation Status: No violations found

Registry ID: 110001177547

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

 Reclamation: Not reported
 POTW: Not reported
 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Background Info: A foundry and an engine manufacturing machine shop were located at the Site from 1907 to 1920. The Site was used for cannery operations from 1920 to 1944. Fuel oil, or "bunker C oil" was stored in historic concrete underground storage tanks (UST). The Site was purchased by Amchem in 1952. Cannery operations equipment, including the concrete USTs, were removed prior to the purchase by Amchem. Between 1952 and 1980, metal-treating chemicals and herbicides containing 2,4-dichlorophenoxyacetic acid (2,4-D) and 2,4,5-trichlorophenoxyacetic acid (2,4,5-T) were formulated at the plant. In 1980, Henkel of America (Henkel, now Henkel Surface Technologies) purchased the Fremont facility, and herbicide production was discontinued. However, Henkel continued the production of metal-treating chemicals. On March 20, 2002, Henkel discontinued all its operations at the Site. Henkel is currently working with regulatory agencies to

remediate the Site for residential development.
Comments Date: 01311992
Comments: Completed RA.
Comments Date: 03241987
Comments: Completed SS. In 1981, sampling performed by DTSC (formerly the
Comments Date: 03241987
Comments: Department of Health Services, Toxic Substances Control
Comments Date: 03241987
Comments: Division) found levels of 2,4-D and 2,4,5-T. Based on these
Comments Date: 03241987
Comments: results, approximately 300 cubic yards of shallow soils were
Comments Date: 03241987
Comments: excavated, along with several buried drums discovered during the
Comments Date: 03241987
Comments: excavation. DTSC approved the cleanup of this area in a letter
Comments Date: 03241987
Comments: dated October 28, 1982. In 1984, underground storage tanks
Comments Date: 03241987
Comments: (USTs) associated with the herbicide manufacturing process were
Comments Date: 03241987
Comments: cleaned and removed from the Site. Soil sampling indicated
Comments Date: 03241987
Comments: significant herbicide contamination existed beneath the tanks.
Comments Date: 03241987
Comments: During the removal of one of the tanks, black oil was observed
Comments Date: 03241987
Comments: in the excavation. In 1985, DTSC requested that Amchem further
Comments Date: 03241987
Comments: study the Site to define areas of historical spills. Meanwhile,
Comments Date: 03241987
Comments: the observation of black oil in an excavation was reported to
Comments Date: 03241987
Comments: the SF Regional Water Quality Control Board (RWQCB). During the
Comments Date: 03241987
Comments: investigations, 2,4-D and 2,4,5-T were found in soils at the
Comments Date: 03241987
Comments: Site at various concentrations and depths. The highest
Comments Date: 03241987
Comments: concentrations of herbicides in soil were 14,000 ppm of 2,4,5-T
Comments Date: 03241987
Comments: and 15,000 ppm of 2,4-D. Herbicides in groundwater were
Comments Date: 03241987
Comments: detected sporadically and at low levels, and did not warrant
Comments Date: 03241987
Comments: remedial action.
Comments Date: 04252003
Comments: Completed Five-Year Review. Investigations into petroleum
Comments Date: 04252003
Comments: hydrocarbon contamination in the 1980s and 1990s found that
Comments Date: 04252003
Comments: approximately 34,000 pounds of oil bound to approximately 26,000
Comments Date: 04252003
Comments: cubic yards of soil beneath the tanks and that groundwater was
Comments Date: 04252003
Comments: contaminated with petroleum hydrocarbons. In 1997, an asphalt
Comments Date: 04252003
Comments: cap was constructed over the tank area. By 2001, groundwater

Comments Date: 04252003
Comments: monitoring had been reduced. The data so far indicates that the
Comments Date: 04252003
Comments: oil in the soil is stable, with no significant leaching to
Comments Date: 04252003
Comments: groundwater. Henkel is currently working with regulatory
Comments Date: 04252003
Comments: agencies to remediate the Site for residential development.
Comments Date: 04252003
Comments: According to a Site Investigation Report submitted in October
Comments Date: 04252003
Comments: 2002, elevated concentrations of 2,4,5-T, 2,4-D, zinc, chromium,
Comments Date: 04252003
Comments: and total petroleum hydrocarbons were detected. In an approval
Comments Date: 04252003
Comments: letter dated December 20,2002, the RWQCB indicated that the Site
Comments Date: 04252003
Comments: was suitable for residential development subject to several
Comments Date: 04252003
Comments: conditions. Among these conditions were that the Site either be
Comments Date: 04252003
Comments: remediated to levels that allow unrestricted use, or risk
Comments Date: 04252003
Comments: managed to assure that future residents not be exposed to
Comments Date: 04252003
Comments: unhealthy levels of contamination. RWQCB noted in its letter
Comments Date: 04252003
Comments: that it was reluctant to utilize the letter option, a primary
Comments Date: 04252003
Comments: concern being the oil contamination beneath the former UST area.
Comments Date: 05301989
Comments: Completed FRA. A RAP was implemented during the months of
Comments Date: 05301989
Comments: August through October of 1988. Approximately 1148 cubic yards
Comments Date: 05301989
Comments: of herbicide-contaminated soil were excavated and transported
Comments Date: 05301989
Comments: offsite for disposal. Post excavation sampling indicated that
Comments Date: 05301989
Comments: the highest residual levels of herbicides remaining in soil were
Comments Date: 05301989
Comments: 2.1 ppm of 2,4-D, well below current risk-based soil screening
Comments Date: 05301989
Comments: levels for residential land use.
Comments Date: 06301989
Comments: Certified Site.
Comments Date: 07011986
Comments: Completed PA. A 2,4-D surface spill in 1978 triggered a series
Comments Date: 07011986
Comments: of soil and groundwater investigations at the Site.

CA BOND EXP. PLAN:

Responsible Party: RESPONSIBLE PARTY-LEAD SITE CLEANUP WORKPLAN
Project Revenue Source Company: Not reported
Project Revenue Source Addr: Not reported
Project Revenue Source City,St,Zip: Not reported
Project Revenue Source Desc:

The responsible party, Amchem Products, Inc., is funding all remedial investigative activities. DHS has entered into a consent order with Amchem and Union Carbide for cleanup of herbicide contamination. DHS will recover 100 percent of its past direct costs plus staff costs and overhead related to the project. The responsible parties will pay all costs associated with cleanup and have agreed to pay for DHS oversight costs for the herbicide cleanup on a quarterly basis. DHS has budgeted \$50,000 for oversight of the herbicide cleanup.

Site Description: Union Carbide operated a chemical formulation facility from 1952 until 1980, when ownership was transferred to Amchem. The Company manufactures acid and alkali-based cleaning compounds, and until July, 1980, blended bases to form herbicides such as Silvex, 2-4-D (2-4 dichlorophenoxyacetic acid) and 2,4,5-T (2,4,5-trichlorophenoxyacetic acid).

Hazardous Waste Desc: Extensive herbicide contamination of the soil has been discovered. Up to 15,000 parts per million (ppm) 2,4-D and 2,4,5-T were discovered in soil down to a depth of 20 feet.

Threat To Public Health & Env: The site is located in a major ground water recharge area. Herbicide contaminated soils could migrate into ground water.

Site Activity Status: Numerous investigations have been conducted since February, 1978 when a herbicide spill from a railroad tank car occurred. Herbicide contamination is being remediated pursuant to a DHS consent order. The RAP has been submitted and approved by DHS. Soil removal was started in August, 1988. About 500 cubic yards of contaminated soil will be excavated and disposed of at Grassy Mountain Disposal Facility in Utah.

Hazardous Waste Summary:

Waste code: 181
Waste name: 181

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN

Event date: 08/15/1994
Event: CMS Imposition

Event date: 07/22/1997
Event: Current Human Exposures under Control, Yes, Current Human Exposures Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of significant changes at the facility.

Event date: 07/22/1997
Event: Migration of Contaminated Groundwater under Control, Yes, Migration of Contaminated Groundwater Under Control has been verified. Based on a review of information contained in the EI determination, it has been determined that migration of contaminated groundwater is under control at the facility. Specifically, this determination indicates that the migration of contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of significant changes at the facility.

Event date: 09/18/1997

Event: Current Human Exposures under Control, Yes, Current Human Exposures Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of significant changes at the facility.

Event date: 12/28/2000
Event: Migration of Contaminated Groundwater under Control, Yes, Migration of Contaminated Groundwater Under Control has been verified. Based on a

review of information contained in the EI determination, it has been determined that migration of contaminated groundwater is under control at the facility. Specifically, this determination indicates that the migration of contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of significant changes at the facility.

Environmental Interest/Information System

California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

SLIC:

Region: STATE
Facility Status: **Open - Remediation**
Status Date: 10/09/2014
Global Id: SL181251125
Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)
Lead Agency Case Number: 0014
Latitude: 37.57418
Longitude: -121.97361
Case Type: Cleanup Program Site
Case Worker: MH
Local Agency: ALAMEDA COUNTY WATER DISTRICT
RB Case Number: 01S0158
File Location: Regional Board
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern: Polychlorinated biphenyls (PCBs), Other Insecticides / Pesticide / Fumigants / Herbicides, Arsenic, Chromium, Lead, Other Metal, Heating Oil / Fuel Oil, Waste Oil / Motor / Hydraulic / Lubricating, Polynuclear aromatic hydrocarbons (PAHs), * * 2,4,5-T, * * 2,4-D, * Insecticides/Fumigants, * Metals/Heavy Metals - Arsenic, * Pesticides/Herbicides, * Petroleum - Home heating oil

Site History: Cleanup actions conducted in the past by Henkel Corporation did not fully address residual site contaminants. The current property owner LENNAR Homes is voluntarily conducting additional soil cleanup to address these residual contaminants. Engeo Consultants conducted data gap investigations in preparation of development, and prepared a soil cleanup plan. LENNAR Homes plans to redevelop the Site with townhomes, commercial units, a community center, and associated landscape areas. The LENNAR Homes team initiated outreach efforts in October 2013 and held community outreach meetings on January 22, 2014 and May 8, 2014. The soil cleanup work will begin on September 22, 2014 and is anticipated to be completed in the first quarter of 2015. If you have any questions or would like to review a full copy of the Removal Action Work Plan it is available on the States electronic records database (GeoTracker, Site Documents) and at the Water Boards office at 1515 Clay Street, Suite 1400, Oakland, CA 94612. Hardcopy Reports for this site are also located DTSC Berkeley. 700 Heinz Ave, Suite 200. Berkeley, CA 94710. Appointment required: Call 540-3800.

Background Info: The Site was reportedly the original site of Kraft Cheese in the early 1900's. From 1924 to 1926, K&L Lumber Company operated at the facility and manufactured wooden cheese boxes for Kraft Cheese. Between 1926 and 1996, Kraftile Company used the property for manufacturing of clay tiles. During Kraftile's operation, the southern portion of the Site was mined for clay deposits. The clay pits were backfilled with soil, construction debris and slag materials. The slag materials were reportedly generated and may have been disposed by Pacific States Steel Company. The site is about 16 acres. High levels of chromium, lead and zinc have been detected in soil and slag samples collected from the Site.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Registry ID: 110011662995

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

Background Info: The Phase III property was one of three parcels of land owned by Pacific States Steel Corporation and was the location where the company operated a steel mill from 1938 to 1978. Steel was produced from imported scrap iron, steel, and wrecked automobiles in open-hearth refractory lined furnaces. Slag was generated from the steel-making process and was deposited on the Phase III and adjacent Phase II properties. The slag that remains on the Phase III property contains arsenic, cadmium, chromium, copper, lead, nickel, and zinc. Other metal-containing materials that were placed on the Phase III property include auto shredder fluff and precipitator dust. Bunker oil and diesel were used on the Site and there are some areas contaminated with petroleum hydrocarbons. Groundwater contamination by cadmium and petroleum hydrocarbons has been found under portions of the Site. A variety of businesses leased portions of the Site between 1977 and 1987. These businesses included freight lines, steel and ironworks, pallet manufacturers, construction companies, and a blacksmith company. Special Masters appointed by the U.S. District Court have been handling the obligations for the defunct Pacific States Steel Corporation since 1984, including its obligations for environmental cleanup. The Court approved an amended Consent Decree between DTSC and Pacific States Steel Corporation for the investigation and cleanup of the Site in November 1988. The Court administrative objectives include remediation of the Site and redevelopment so funds can be generated to pay for the

pension benefits of the former steelworkers. Cleanup of the southern portion of the Phase III property has been completed and single-family homes are currently being constructed on the area. Another residential development and a commercial development are planned for the northern portion of the Site once cleanup is completed.

Background Info: The Pacific State Steel Corporation (PSSC) property comprises three parcels of land: Phase I at 7th and Mission Street is about 5.5 acres; Phase II, the east property is about 16.6 acres; Phase III, the former plant site is 70 acres. The former PSSC steel mill production facilities located on Phase III operated from 1938 to 1978. Phase II was purchased as a disposal area for slag and industrial waste water generated in the steel making process from 1966 to 1978. Prior to this, Phase II was used for agricultural purposes.
Comments Date: 03111980
Comments: Site Discovery.
Comments Date: 04091992
Comments: Completed Focused RIFS for Phase II. The slag contains elevated

CA BOND EXP. PLAN:

Responsible Party: RESPONSIBLE PARTY-LEAD SITE CLEANUP WORKPLAN
Project Revenue Source Company: Not reported
Project Revenue Source Addr: Not reported
Project Revenue Source City,St,Zip: Not reported
Project Revenue Source Desc: The RP, through the U.S. District Court, is in compliance with an order issued by DHS. Proceeds from the sale of uncontaminated portions of the site will be used to finance RI/FS and cleanup activities. DHS has budgeted \$100,000 for direct costs related to the project. DHS will recover 100 percent of direct costs plus staff costs and overhead related to the project. The RP will pay all costs associated with RI/FS and cleanup activities.
Site Description: A steel manufacturing facility existed at the site from 1935 to 1978. Slag piles and evaporation ponds remain at the site.
Hazardous Waste Desc: Heavy metals (cadmium, chromium, nickel, lead, and zinc), oils and total petroleum hydrocarbon have been detected in slag piles and ponds onsite. Transformers and capacitors containing polychlorinated biphenyl (PCBs) and asbestos material are found onsite.
Threat To Public Health & Env: Contaminants at the site may migrate offsite via wind dispersion, surface runoff and ground water transport, resulting in a adverse impact on human/animal health and the environment.
Site Activity Status: Pacific States Steel is in receivership under the federal court. The affairs of Pacific States Steel are handled by an appointee of the U.S. District Court. Limited site sampling has been conducted by DHS and Pacific States Steel. Under their reorganization plan, the court has entered into a consent decree with DHS

 Waste name: 792

Waste code: D002
 Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D004
 Waste name: ARSENIC

Waste code: D007
 Waste name: CHROMIUM

Waste code: D008
 Waste name: LEAD

Waste code: F006
 Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Waste code: D001
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Event date: 02/03/2012
Event: Migration of Contaminated Groundwater under Control, Yes, Migration of Contaminated Groundwater Under Control has been verified. Based on a review of information contained in the EI determination, it has been determined that migration of contaminated groundwater is under control at the facility. Specifically, this determination indicates that the migration of contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of significant changes at the facility.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/16/2014	Source: EPA

Number of Days to Update: 32	Next Scheduled EDR Contact: 04/20/2015
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/16/2014	Source: EPA

	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810
Date Made Active in Reports: 02/13/2014	Last EDR Contact: 01/09/2015
Number of Days to Update: 94	Next Scheduled EDR Contact: 03/09/2015
	Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 07/21/2014	Source: Environmental Protection Agency
Date Data Arrived at EDR: 10/07/2014	Telephone: 703-603-8704

	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Number of Days to Update: 31	Next Scheduled EDR Contact: 06/15/2015
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 09/18/2014	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/19/2014	Telephone: 703-603-0695

Number of Days to Update: 31	Next Scheduled EDR Contact: 06/15/2015
	Data Release Frequency: Varies

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 12/03/2014	Source: Department of the Navy
Date Data Arrived at EDR: 12/12/2014	Telephone: 843-820-7326
Date Made Active in Reports: 01/29/2015	Last EDR Contact: 02/16/2015
Number of Days to Update: 48	Next Scheduled EDR Contact: 06/01/2015
	Data Release Frequency: Varies

Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 09/29/2014	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 09/30/2014	Telephone: 202-267-2180
Date Made Active in Reports: 11/06/2014	Last EDR Contact: 12/29/2014
Number of Days to Update: 37	Next Scheduled EDR Contact: 04/13/2015
	Data Release Frequency: Annually

State- and tribal - equivalent NPL

RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 11/03/2014	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 11/04/2014	Telephone: 916-323-3400
Date Made Active in Reports: 12/12/2014	Last EDR Contact: 02/03/2015
Number of Days to Update: 38	Next Scheduled EDR Contact: 05/18/2015
	Data Release Frequency: Quarterly

State- and tribal - equivalent CERCLIS

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 11/03/2014	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 11/04/2014	Telephone: 916-323-3400
Date Made Active in Reports: 12/12/2014	Last EDR Contact: 02/03/2015
Number of Days to Update: 38	Next Scheduled EDR Contact: 05/18/2015

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 11/10/2014	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 12/01/2014	Telephone: 202-307-1000

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Number of Days to Update: 18	Next Scheduled EDR Contact: 04/06/2015
	Data Release Frequency: No Update Planned

DRYCLEANERS: Cleaner Facilities

A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaner's agents; linen supply; coin-operated laundries and cleaning; drycleaning plants, except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

Date of Government Version: 06/28/2014	Source: Department of Toxic Substance Control
Date Data Arrived at EDR: 07/03/2014	Telephone: 916-327-4498
Date Made Active in Reports: 08/21/2014	Last EDR Contact: 02/16/2015
Number of Days to Update: 49	Next Scheduled EDR Contact: 03/23/2015
	Data Release Frequency: Annually

WIP: Well Investigation Program Case List

Well Investigation Program case in the San Gabriel and San Fernando Valley area.

Date of Government Version: 07/03/2009	Source: Los Angeles Water Quality Control Board
Date Data Arrived at EDR: 07/21/2009	Telephone: 213-576-6726
Date Made Active in Reports: 08/03/2009	Last EDR Contact: 12/23/2014
Number of Days to Update: 13	Next Scheduled EDR Contact: 04/13/2015
	Data Release Frequency: Varies

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ENF: Enforcement Action Listing

A listing of Water Board Enforcement Actions. Formal is everything except Oral/Verbal Communication, Notice of Violation, Expedited Payment Letter, and Staff Enforcement Letter.

Date of Government Version: 01/26/2015	Source: State Water Resources Control Board
Date Data Arrived at EDR: 01/28/2015	Telephone: 916-445-9379
Date Made Active in Reports: 02/26/2015	Last EDR Contact: 01/26/2015
Number of Days to Update: 29	Next Scheduled EDR Contact: 05/11/2015
	Data Release Frequency: Varies

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 11/11/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/18/2012	Telephone: 703-308-4044

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013	Source: Environmental Protection Agency

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

Most Recent Revision:	1999

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u>	FEMA Flood
ALAMEDA, CA	<u>Electronic Data</u>
	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 06001C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	NWI Electronic
NILES	<u>Data Coverage</u>
	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1 - 2 Miles WNW
Site Name:	Pacific States Steel
Site EPA ID Number:	CAD980363030
Groundwater Flow Direction:	NOT AVAILABLE.
Inferred Depth to Water:	42 feet.
Hydraulic Connection:	Three interconnected aquifers underlie the area within two miles of the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

F36	1/2 - 1 Mile SSE	SE

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Yolo

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 7.3 Min: 6.1
2	7 inches	59 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14 Min: 4	Max: 8.4 Min: 6.1

Soil Map ID: 2

Soil Component Name: Danville

Soil Surface Texture: silty clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	20 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 7.3 Min: 6.1
2	20 inches	53 inches	silty clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 7.3 Min: 6.1
3	53 inches	79 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 6.6

Soil Map ID: 3

Soil Component Name: Yolo

Soil Surface Texture: loam

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	16 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 7.8 Min: 7.4
2	16 inches	59 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 14 Min: 4	Max: 8.4 Min: 7.9

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

RADON

State Database: CA Radon

Source: Department of Health Services

Telephone: 916-324-2208

Radon Database for California

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

EDR Inquiry # 4220423.3

Contact: Woody Lovejoy

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by The Consulting Group were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

The Consulting Group (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EDR Environmental LienSearch™ Report

The EDR Environmental LienSearch Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.

Please contact EDR at 1-800-352-0050
with any questions or comments.

The EDR Property Tax Map Report

EDR Property Tax Map Report

Environmental Data Resources, Inc.'s EDR Property Tax Map Report is designed to assist environmental professionals in evaluating potential environmental conditions on a target property by understanding property boundaries and other characteristics. The report includes a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

Thank you for your business.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquiries (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of The Consulting Group on Feb 27, 2015.

TARGET PROPERTY

Niles Blvd
Fremont, CA 94536

SEARCH METHODS

EDR searches available lists for both the Target Property and Surrounding Properties.

RESEARCH SUMMARY

Building permits identified: **YES**

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeyman:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use(s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000

Permit Type: Bldg -

New Permit Number: 101000000405

Status: Valuation: \$1,000,000.00

Contractor Company: OWNER-BUILDER

Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of the ASTM Standard Practice for Assessment of Vapor Encroachment into Structures on Property Involved in Real Estate Transactions (E 2600-10).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

EXECUTIVE SUMMARY

Soil Map ID: 1

Soil Component Name: Yolo

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 7.3 Min: 6.1
2	7 inches	59 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 14 Min: 4	Max: 8.4 Min: 6.1

Soil Map ID: 2

Soil Component Name: Danville

Soil Surface Texture: silty clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

EXECUTIVE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	20 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 7.3 Min: 6.1
2	20 inches	53 inches	silty clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 7.3 Min: 6.1
3	53 inches	79 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 6.6

Soil Map ID: 3

Soil Component Name: Yolo

Soil Surface Texture: loam

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

EXECUTIVE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)

RECORD SOURCES AND CURRENCY

To maintain currency of the following databases, EDR contacts the appropriate agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

PRP: Potentially Responsible Parties

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

A listing of verified Potentially Responsible Parties

Date of Government Version: 10/25/2013

Source: EPA

Number of Days to Update: 3

Telephone: 202-564-6023

Last EDR Contact :02/13/2015

RMP: Risk Management Plans

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

DEED: Deed Restriction Listing

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: 0.333 Mile

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

ENVIROSTOR: EnviroStor Database

Standard Environmental Record Source: State and tribal - equivalent CERCLIS

Search Distance: 0.333 Mile

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

HAZNET: Facility and Manifest Data

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

2020 COR ACTION: 2020 Corrective Action Program List

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: 0.25 Mile

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Source: EPA
Telephone: 703-412-9810

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: 0.333 Mile

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

EPA WATCH LIST: EPA WATCH LIST

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: Property

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

US BROWNFIELDS: A Listing of Brownfields Sites

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: 0.333 Mile

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

EDR MGP: EDR Proprietary Manufactured Gas Plants

Standard Environmental Record Source: Former manufactured Gas Plants

Search Distance: 0.333 Mile

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

Standard Environmental Record Source: Historical Gas Stations

Search Distance: 0.25 Mile

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

RECORD SOURCES AND CURRENCY

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5' minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW® Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW® Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services. The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Appendix 12 - Summary Resume

SHERWOOD LOVEJOY, JR., P.G., R.E.A., C.E.I., C.E.C., C.M.A., C.M.I.
Principal Consulting Hydrogeologist / Registered Environmental Assessor

Years of Experience with This Firm: 22 with Other Firms: 9

Education: Degree(s) / Year / Specialization:

- M.S., 1993, Environmental Science and Management, University of San Francisco
- B.A., 1982, Geology, University of Rhode Island, Kingston, Rhode Island
- B.S., 1981, Zoology, University of Rhode Island, Kingston, Rhode Island
- Graduate Studies, 1982 - 1983 Hydrology, Geophysics, Advanced Structural Geology and Geochemistry, University of Maryland, College Park, Maryland

Active Registrations:

- Professional Geologist #TN-1566, State of Tennessee
- Professional Geologist #PG-2166, State of Wyoming
- Registered Environmental Assessor # REA (I)-03171, State of California
- General Engineering Contractor's (Class A) #540389, State of California
- Class A - Hazardous Waste Removal Certification #540389, State of California
- Well Driller License (C-57), #540389, State of California
- Certified Environmental Inspector #6331, National Registration for EAA,
- Certified Environmental Consultant, #6331, National Registration for EAA
- Certified Mold Assessor, #6331, National Registration for EAA
- Certified Mold Inspector, #6331, National Registration for EAA
- 40 Hour OSHA and 8 Hour OSHA Management Training

Experience and Qualifications:

- 1991-Present - Principal Consulting Hydrogeologist, The Consulting Group (TCG)
- 1994 -1995 - President/Principal Hydrogeologist, MRD - Environmental Services, Inc.
- 1990 -1991 - President/CEO/Principal Hydrogeologist, Hawaiian Geologic Resources, Inc.
- 1988 -1991 - President/CEO/Principal Hydrogeologist, Western Geologic Resources, Inc.
 - Environmental Site Investigation & Assessment
 - Remediation Strategy Development
 - Facility Demolition/Plant Reclamation Strategy Development and Oversight
 - Underground Tank Compliance & Soil Remediation of Fuel Contamination
 - Demolition/Reconstruction Management and Oversight
 - Hydrogeological Assessment and Modeling
 - Groundwater Monitor Well Installation, Sampling, and Monitoring
 - Chemical Stabilization of Metals and pH in Soil
 - Mine Audits, Investigations, Reclamation Studies, and Reclamation Design
 - Regulatory Liaison, Negotiation, and Site Closure
 - Construction Management and Contractor Oversight

Mr. Lovejoy heads TCG's surface and subsurface contamination investigation and remediation program. Clients are well represented by Mr. Lovejoy's extensive experience and expertise in the latest soil and groundwater investigation and remediation techniques and methods. In addition, clients benefit as they are skillfully represented during regulatory agency interaction, negotiation and permitting.
