Subject: California Nursery Bathrooms

Hello City Council members,

I am opposed to the current plans to put a modular bathroom at the historic California Nursery Park. I have no problem with putting a bathroom in that park and in the proposed location.

I do have problems with a modern appearing bathroom in a historic park. This bathroom should look like a bathroom from the early 1900's with either ship lap siding or board and bat siding and should have a definite slant to the roof. Further more in this time, the City of Fremont should be putting in "All Gender-handicap" bathrooms. Gender identification is becoming a problem and the only way to solve it is to have individual bathrooms for any person of any sex or physical ability to use safely. Please remove this item from the consent calendar so members of the public and members of the City Council can comment on this issue.

Thank you.
