Subject: Say NO to deadly concrete barriers

Dear Fremont City Council,

I strongly request you to decline the concrete barrier solution being presented to you by PWD on 5/2/23 city council meeting.

Speeding and distracted driving on narrowed lanes alongside a concrete barrier with little to no traffic enforcement is a recipe for disaster. It would be irresponsible for the city council to approve this proposal.

Please ask PWD to go back to the drawing board present other options to address safety of bikers without making it deadly for others and send a survey to all Fremont residents to seek our input on the solutions.

Sincerely,
Gregory Stewart

Subject: concrete barrier

Please do not put concrete barriers to separate bike lanes from car lanes. It is a waste of money and dangerous for car traffic. You have messed up the roads enough with those ridiculous islands that took away turning lanes and impede fire trucks. This town is becoming a traffic nightmare . You spent all that money for the dividers and now you want to rip it out and start over!!!! Fix the pot holes and enforce the speed limit.

I am leaving this town but and writing for all those who cannot leave.

Sincerely,
Judy Bravo

Dear Fremont City Council,

I strongly request you to decline the concrete barrier solution being presented to you by PWD on 5/2/23 city council meeting.

Speeding and distracted driving on narrowed lanes alongside a concrete barrier with little to no traffic enforcement is a recipe for disaster. It would be irresponsible for the city council to approve this proposal.

Please ask PWD to go back to the drawing board present other options to address safety of bikers without making it deadly for others and send a survey to all Fremont residents to seek our input on the solutions.

Sincerely,
Robin Grivois

Subject: Say YES to concrete barriers

Dear Fremont City Council,

We strongly support the separation of bike and vehicular traffic via hard solutions like the concrete barrier solution presented to you at the 5/2/23 city council meeting.

Speeding and distracted driving puts all cyclists at risk. The city council should work to improve our ability to protect those biking to work, church, school or for recreation. The only path to minimizing climate change is to reduce greenhouse gases. Encouraging commuters to bike to work is effective but only if safety can be guaranteed.

Please continue to focus on the safety of bikers. The recent deaths on our city streets must not be repeated. Vision Zero works to reduce pedestrian and cyclists deaths. wm
